

HIGH END SYSTEMS

a Barco company

SolaSpot Pro 1500

SolaSpot Pro 1500 outputs 20,000 lumens using a 400w LED engine! Unparalleled LED brightness coupled with features including framing shutters, CMY color mixing, linear CTO, two gobo wheels, animation effects, a prism, an iris, frost and an 8 to 45 degree zoom range.

High End's patents, including the lens defog system which is essential in LED fixtures as well as our thermal protection patents which ensure the fixture always operates to the best of its ability.

HES Gear Does The Serious Work On Grease

The High End lighting included a dozen SolaSpot Pro 1500s, four SolaSpot Pro 2000s, six SolaWash Pro 2000s, eight SolaSpot Pro CMYs, eight UNOs, three SHAPESHIFTER C1s and a pair of SHAPESHIFTER W1's.

The twelve SolaSpot Pro 1500s were pivotal to his design. Colin says, "I used five 1500s from an advance truss position for gobo washes and tight specials, two were in a low proscenium boom sidelight position, with the remaining five being overhead onstage. The shuttering was a particular 'must have' feature for these positions, so I could cut the sidelight off the floor, and also use shutter cuts to take light off the LED curtains. I also found the mixing of subtle colors using CMY, combined with the CTO filter, allowed me a very natural front light when desired, but the fixtures have such a clean looking white when I wanted some intense looks too."
